ANNOUNCEMENT TO CLIENTS

Fitzpatrick Woods Consulting Provides New European Services for Australian Industry

As a service to clients, Fitzpatrick Woods Consulting has spent the last two months establishing a European service arrangement. FWC has entered into an agency agreement to provide additional support to clients from a base in Geneva in Switzerland.

Announcing the new European agency arrangements, FWC Principal Tim Woods commented that “Increasingly, Australian links to the world require contact with global representative, industry and governance organisations. Providing a European agent is an efficient way to provide the services our clients need.”

Through the agency arrangements, FWC has access to a range of consultants and experts and also provides coordination and logistical support to support client activities in Europe. FWC now has immediate access and ongoing contact with European based organisations including:

- Program for Endorsement of Forest Certification (PEFC) in Geneva
- Food and Agriculture Organisation (FAO) of the United Nations in Geneva
- International Labour Organisation (ILO)
- European Credit Banks

“FWC already has clients accessing these types of organisations through our European colleagues. It is more immediate and efficient than spending a week and thousands of dollars just to attend meetings or to provide brief updates to business partners.” Mr Woods said.

Australian clients of FWC are requested to contact FWC on 03 9437 2238 or at info@fitzpatrickwoods.com.au to discuss their European needs.
